

English/Serbian Aligned Corpus (SrpEngKor)

This corpus consists of English source texts aligned with their translations into Serbian, and Serbian source texts aligned with their English translations, as well as of several aligned English and Serbian translations of literary texts originally in French. The texts belong to various domains: fiction, general news, scientific journals, web journalism, health, law, education, and movie sub-titles. There are also several Serbian translations of texts from the 'Acquis communautaire' corpus and from the 'Intera' corpus aligned with their originals. The alignment was performed on the subsentential level. The texts were segmented and aligned automatically and then manually checked. In most cases the alignment is one-to-one. The size of the corpus is 4,420,711 words (2,330,742 in the English part, 2,089,969 in the Serbian part).
